LeapPoint DataBridge ✕

UNLOCK INSIGHTS & VISUALIZE TRENDS FROM ADOBE WORKFRONT

LeapPoint DataBridge helps organizations **transform their data out of Workfront** to assemble and publish high-impact reports in no time.

You've taken the first step by centralizing and orchestrating your work with Adobe Workfront. But why stop there? Savvy marketers that can use data to deliver experiences that keep customers wanting more will leave their competitors in the dust.

With LeapPoint DataBridge you can easily pull data out of Workfront to achieve more robust analysis, detailed trend reporting, and improved insights. DataBridge integrates with best-in-class visualization platforms (Tableau, PowerBI, etc.) to ensure you have the most efficient workflow and powerful insights at your fingertips.

A Complete Picture

Convert raw data from Workfront into an easily ingestible format to connect with the visualization tool of your choice. Capture multiple snapshots to support trend reporting to dive even deeper.

Your Data, Your Way

DataBridge allows you to choose what fields get mapped, what direction the data is moving, and the frequency of the updates. All from an intuitive, web-based interface that allows you to make changes on the fly.

Gain easier access to the data you need to produce high-quality, in-depth reports

Aggregate data from additional sources to enable deeper analysis

Automate the ingestion of raw data from Workfront into the visualization tool of your choice

Choose the frequency of data snapshots from Workfront (hourly, daily, weekly, etc.)

Securely transfer and store data as it syncs between systems

Connect to limitless possibilities.

What Are You Waiting For?
