

LeapPoint 
RequestHub

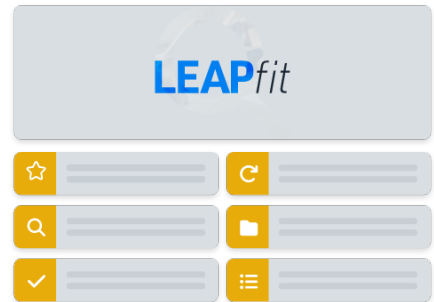

ONE REQUEST TOOL TO RULE THEM ALL

Are you looking to improve the experience for your requesters in **Adobe Workfront**? With LeapPoint RequestHub, teammates can say goodbye to wasted time and hello to greater efficiency.

LeapPoint RequestHub is an enhanced request portal for Adobe Workfront. With the option to incorporate your company's own branding and a familiar e-commerce style experience, requesters can more intuitively navigate to and request the marketing services they need.

- **Inspire Confidence:** With requests consolidated into a single, custom-branded, easily accessible portal, requests can be submitted faster, with fewer clicks, and less redundancy.
- **Support Requests from Anywhere, Anytime:** Web-based and responsive, users can submit a request no matter where they are, improving efficiency and making their lives easier.
- **Automate Your Workflows:** With LeapPoint RequestHub directly integrated with Adobe Workfront via Fusion, requests can be automatically converted into projects and tasks and resources can be assigned in a flash.

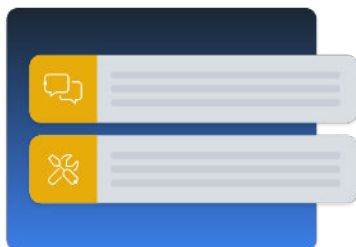

Simple, Familiar Design

Eliminate multiple project requests. Allow users to select the type of support they need, fill out the required information, and LeapPoint RequestHub takes care of the rest.

Get Requests Fulfilled Quickly & Accurately

Add beautiful visuals, videos, and detailed descriptions—everything your requesters need to manage their expectations around scope and timing.

Customize

With your branding (fonts, logos, colors, etc.)

Enhance

Employee experience with a more visual process

Deploy

On-premise or in the cloud

What Are You Waiting For?

Experience first-hand how RequestHub can help your organization get even more out of Adobe Workfront. Request a demo: sales@leapoint.com.
